

# SeaSight Double Winch

**Highly reliable and ruggedly built double winch, designed to provide optimum camera positioning inside the pen.**

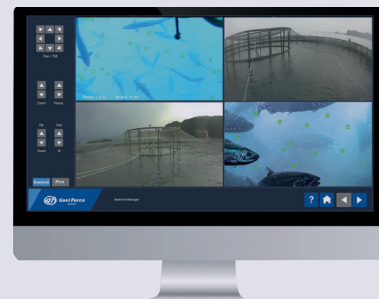

**Our camera winch technology has been significantly advanced with the development of the SeaSight Double Winch. It's safe and easy to use, can be mounted onto Gael Force pen systems and can be remotely operated via the visually intuitive SeaSight Control or manually at the pen.**

## Key Features

- Rugged construction – designed and manufactured specifically for the aquaculture industry.
- Vertical and horizontal movement, to allow optimum camera positioning.
- IP 67 Rated.
- Safe and easy to use.
- Remote operation (via SeaSight Control) and manual (on pen) control.
- Low power consumption (<1A per reel). 230Vac power.
- Integrated brake to prevent un-wanted spool out.
- Reliable and rugged “capstan” drive on horizontal movement.
- Compatible and easily integrated into currently installed SeaSight camera systems.
- Easily mounted to all commonly used pens and integrated mounting solution to SeaQurePen.

## SeaSight Control

Operation of the double winch with SeaSight Control is intuitive and simple. With a clean visual appearance which is easy on the eye, navigation is straightforward. Camera windows are completely scalable and can be user-defined, and zoom, focus and multi-directional control on both the camera and winch is standard.
